# loyola hacks education

when?   **October 1st, 2016 | 9am - 6pm | Cuneo 311 (LSC)**

what?   **Teams of programmers use their skills to further education. Compete and collaborate with fellow loyolans to: create something that could help children focus, create something that allows teachers better lesson-planning, create something that finds you relevant material for a topic. Create something that can help those less fortunate.**

who?   **Everyone. Undergraduates, graduates, faculty, and staff. The entire Loyola family is welcome. Some programming experience is recommended, though, anyone who is passionate about education is also welcome to attend. Come as a group or alone**
